Reference: (1) KIUC's Transmittal Letter, dated July 27, 2006, at 2; and (2) KIUC's Small Generator Interconnection Policies and Procedures, at 3 – 4.

KIUC explains:

. . . In establishing these Policies and Procedures, KIUC decided not to limit the application of these Policies and Procedures to only distributed generating facilities, but to any generators less than or equal to 20 megawatts ('MW') in size. In doing so, KIUC utilized as its starting point in preparing these Policies and Procedures the standard procedures issued by the Federal Energy Regulatory Commission ('FERC') on May 12, 2005 to govern the interconnection of generators no larger than 20 MW.

Please fully explain KIUC's basis and reasons for limiting its Interconnection Tariff to generators no more than 20 MW in size (technical, safety, reliability, power quality, other reasons).
